1. (6 pts) Find the Taylor series at $x = 0$ for $x \ln(1+x)$.

Taylor series for $f(x) = \ln x$ centered at $x = 1$ is

$$\sum_{k=0}^{\infty} \frac{f^{(k)}(1) (x-1)^k}{k!}$$

where

$$f^{(1)}(x) = \frac{1}{x}$$

$$f^{(2)}(x) = -\frac{1}{x^2}$$

$$f^{(n)}(x) = \frac{(-1)^{n+1} (n-1)!}{x^n}$$

$$\sum_{k=0}^{\infty} \frac{(k-1)! (-1)^{k+1} (x-1)^k}{k!} = \sum_{k=0}^{\infty} \frac{(-1)^{k+1} (x-1)^k}{k} = \ln x$$

thus $\ln(1+x) = \sum_{k=0}^{\infty} \frac{(-1)^{k+1} x^k}{k}$ and so $x \ln(1+x)$

$$\sum_{k=0}^{\infty} \frac{(-1)^{k+1} x^{k+1}}{k}$$

2. (4 pts) Copy vectors \mathbf{u} , \mathbf{v} , \mathbf{w} head to tail as needed to sketch the indicated vector.

a. $\mathbf{u} - \mathbf{v}$  \Rightarrow b. $\mathbf{u} - \mathbf{v} + \mathbf{w}$  \Rightarrow
