QUIZ #2

Problem 1 (5 points): Does the series

$$\sum_{n=1}^{\infty} \frac{1}{n\sqrt[n]{n}}$$

converge or diverge? Give reasons for your answer.

We know the serves 
$$\frac{1}{N}$$
 and  $\frac{1}{N}$  we have that  $\frac{1}{N}$  and  $\frac{1}{N}$  and

Problem 2 (5 points): Does the series

$$\sum_{n=2}^{\infty} \frac{n}{(\ln n)^n}$$

converge or diverge? Give reasons for your answer.

Lets apply the ratio test which says that for 
$$\sum_{n=2}^{\infty} a_n$$
 , we have converges if  $\lim_{n\to\infty} \sqrt[n]{|a_n|} < 1$ , diverges if  $\lim_{n\to\infty} \sqrt[n]{|a_n|} < 1$ , and inconclusing results if  $\lim_{n\to\infty} \sqrt[n]{|a_n|} > 1$ .

So  $\lim_{n\to\infty} \sqrt[n]{|a_n|} = \lim_{n\to\infty} \sqrt[n]{|a_n|} = 1$ .

$$= \lim_{n\to\infty} \sqrt[n]{|a_n|} = \lim_{n\to\infty} \sqrt[n]{|a_n|} = \lim_{n\to\infty} \sqrt[n]{|a_n|} = 1$$
.

So by ratio lest  $\sum_{n=2}^{\infty} a_n = \sum_{n=2}^{\infty} \frac{a_n}{|a_n|^n}$  converges
